

Morpho V2 (Pearl) by TCC Fashion - Pokerdeck

Butterflies stand as nature's most elegant marvels. Emerging silently from dormant chrysalises, they unfurl their wings the moment metamorphosis completes, embracing the boundless freedom of the sky.

Their fleeting yet radiant lives make every wingbeat precious. Delicate and dainty as they are, they possess unyielding resilience: enduring confinement, finishing transformation, and soaring toward the light. This journey from slumber to bloom bestows upon butterflies their timeless symbolism: freedom, metamorphosis and rebirth.

Morpho V2 Pearl

- Die-cut window & Cold foil tuck
- Cold foil card backs

The Pearl Deck

is inspired by the Green Commodore, with the bright colors and intricate patterns of its wings serving as the core of the design. On the tuck, we use a vibrant pink as the main color, combined with cold foil techniques, allowing the hues to shimmer in the light and create a lively, butterfly-like visual effect. As pink butterflies intertwine with flowers, colors gently flow between wings and petals. In that moment, art and nature are no longer separate—they quietly merge before your eyes, unfolding a scene both tender and full of life.
