

Kirin Dice 2.0 by Classicho

Kirin Dice 2.0

: Refined design and expanding new possibilities.

A spectator freely names numbers from 1 to 6. The magician places dice into the box. Then, with a snap of the fingers, the red dice transform to match one of the chosen numbers. Another snap, and the blue dice change to match the second chosen number!

The locking mechanism of **Kirin Dice 2.0** has evolved into a more elegant, ritualistic drawer-style wooden box. When handed to spectators, they cannot alter any numbers no matter how they shake the box.

Compared to version 1.0, this upgraded model features an independent compartment system, allowing you to freely use any number of dice instead of being limited to three or six. This flexibility opens up a wealth of new routines and creative possibilities.

The dice themselves are made from common red and blue plastic with a standard 18mm size, giving them a familiar, natural look. You can also substitute them with other dice of the same dimensions if desired.

Features:

- Locking Mechanism in Upgraded Drawer-Style Design - only you can activate the gimmick.
- Independent Compartment System - freely use any number of dice
- Effortless Operation - focus fully on performance

Includes:

- Main Drawer Wooden Box • 1
- Red 18mm Plastic Dice • 3
- Blue 18mm Plastic Dice • 3

Dimensions:

- Outer Box: 80 Å— 103 Å— 47mm
- Inner Box: 75 Å— 92 Å— 22mm
- Dice: 18 Å— 18 Å— 18mm

Note

: Shaking during shipping is unavoidable, so each die is secured with foam padding to prevent damage from shifting. When you receive the Klein Dice 2.0, compressed foam may obstruct the drawer opening, making it difficult to open. Don't worry, simply lay the drawer flat and gently shake it vertically for a moment to open smoothly. Avoid forcefully pulling the drawer handle to prevent product damage.
