

Perception (Blue) by Marco Markiewicz

Discover **PERCEPTION**, the latest mentalism effect by Marco Markiewicz.

An ordinary deck of cards. A spectator freely chooses any card. You, however, have your eyes closed and your head turned away.

The card is then returned to the deck, and the cards are shuffled. You haven't seen a thing...

Once the shuffle is complete, you open your eyes and take a small board out of your pocket. You write the name of a card on it, then turn it around.

The card written on the board is exactly the card chosen by the spectator.

PERCEPTION is a direct, visual, and impossible effect in which perception becomes your only true tool.
