

Next Egg Bag by Héctor Mancha and Gee Magic

The Egg Bag

is a timeless classic that has fooled audiences for generations. Hector Mancha has taken this legendary plot and elevated it to an entirely new level with a sharper structure, relentless comedy, and a finale more powerful than anything seen before.

Eight minutes of escalating laughter, perfectly timed misdirection, and a climax that leaves audiences with nothing to reconstruct, only the unforgettable memory of being completely fooled.

In the impossible finale, one spectator is holding the egg inside the magician's pocket. Without the magician ever going near the bag, the egg vanishes from the spectator's grasp and instantly reappears inside the Egg Bag, which has been held by a second spectator from the very beginning. Just moments earlier, that same spectator had thoroughly examined the bag and confirmed it was completely empty.

Produced in collaboration with Gee Magic and designed for the working professional, this routine has been tested for years in front of real audiences and refined until every beat lands with maximum impact.

A FISM Grand Prix-winning routine, reimagined for the modern magician by Hector Mancha and Gee Magic.
