

## Labyrinth by Dave Loosley & TCC Magic

### Labyrinth

is a concealed holdout system used by award-winning magician Dave Loosley in his Magic Circle competition routine.

Designed as a powerful opener for coin magic, it lets you produce one to four half-dollar-sized coins in clever, astonishing ways.

The core gimmick is made from a soft material that creates virtually no friction noise between the coins and the gimmick during performance. Its specially designed textured edge feels like a deck of cards, allowing it to blend naturally with the deck and remain completely hidden among the cards.

Resilient TPU lets Labyrinth flex with the deck as you perform. With the gimmick in place, you can still shuffle, spring the cards, and execute a pinky count without compromising your handling.

**Labyrinth** includes an ultra-detailed exclusive tutorial that covers everything from assembly to practical performance, along with a variety of useful sleights and ingenious routines.

Main unit: 63.5 mm × 89 mm

**Ready to add a phenomenal opener to your coin magic?**
