

PrediChange 2.0 by Yonel Arcade

Discover Ultimate **Predichange**, a visually stunning magic effect that brings a truly professional edge to your close-up performances.

The concept is simple yet incredibly powerful. The magician writes a prediction on the back of a card, then invites a spectator to freely select a card from a regular deck. When the prediction is revealed, it appears to be incorrect. But everything changes when, right before the spectator's eyes and without ever looking away from the card the writing visually transforms into the correct card. The effect is immediate, baffling, and deeply memorable.

This gimmick allows you to achieve an impact similar to the famous "Wow" effect, while going even further thanks to a unique idea: it's not just the card that changes the writing itself transforms. This detail makes the effect even more surprising and unexpected for the audience.

Carefully designed, this trick can be examined up close with excellent viewing angles. It's also very easy to learn, allowing you to quickly add it to your repertoire.

Supplied with a special Bicycle card, **Predichange** is a creation by Yonel Arcade, known for the quality and ingenuity of his effects.

A must-have for any magician looking to perform a strong, modern, and impactful visual effect.

- Extremely powerful visual effect
- Immediate audience impact
- Unique concept
- Easy to learn
- No angle restrictions
- Self-working
- Ready to use
