

Picture Monte Pro by Terry Chou & TCC Magic

A Different Twist on the Classic Three-Card Monte Effect.

Inspired by the classic Three Card Monte effect, Picture Monte Pro reimagines the routine with a fresh twist. Instead of playing cards, the magician uses elegant picture frames.

You display three picture frames, mix their positions, and then ask the audience to follow the odd one out. No matter how confident they are, it always eludes them - culminating in a surprising and delightful twist.

Made from premium walnut wood, the frames are both stylish and durable, adding a touch of class to your performance. The picture frame stands not only enhance presentation and add a ceremonial feel to the routine.

Plus, the images inside the frames are fully customizable - Easily replace the included images with family photos, company logos, or artwork for a personalized touch.

Picture Monte Pro transforms a classic gambling routine into an elegant storytelling tool that connects emotionally with your audience.
