

Gone Ring by Vladimir Zhukov x HIDE

The talk of Blackpool Magic Convention 2026 - Gone Ring by Vladimir Zhukov x HIDE

Picture this: you put a spectator's ring inside what looks like a completely ordinary playing card box. They shake it. They can hear it rattling inside. Then, in one impossible moment, it's gone. Vanished right in their hands. And when it reappears somewhere they never expected? That's the moment they'll never forget.

Gone Ring is a close-up magic trick built for real-world performance. The secret lives inside a beautifully gimmicked card box that looks 100% ordinary from every angle. Hand it to another magician, let a spectator turn it over, squeeze it, inspect it. Nobody will find a thing.

What makes it special:

The box is not a one-trick pony. You can vanish a ring, car keys, a coin, or any small personal object your spectator hands you. The object goes in, gets shaken around so everyone hears it, and then it disappears. Clean, visual, and completely baffling.

Reset takes just a second, so you can run this back-to-back for a whole table of spectators without skipping a beat. No complicated prep, no awkward resets, no gimmick that wears out fast.

What you get:

- The gimmicked card box (looks completely ordinary, even holds a full deck)
- A protective package for the box
- A detailed tutorial covering 4 ready-to-perform routines, plus tons of room to make it your own

Whether you're a close-up worker, a mentalist who loves object work, or a hobbyist magician who wants something that plays huge with zero heat, Gone Ring is the kind of prop you'll reach for over and over again!
