

Candy Clown by Juan Pablo

Candy and Clowns

is an ideal routine for kids' shows.

It's an interactive and very fun routine with an unexpected ending.

A child tries to win a treat by guessing which of four jumbo clown cards is holding the candy.

During the trick, the child never guesses correctly and seems unlikely to win, but after several funny situations that arise during the routine, the magician magically helps the child win the CANDY.

Candy and Clowns is very easy to perform, every entertaining, and the children actively participate throughout the routine.

The jumbo clown cards are made of durable, high-quality plastic.
