

Happy Sad by Joker and the Thief - Pokerdeck

Happy Sad

joins Joker and the Thief's line of Cardistry decks!

Contemporary and fun, this deck picks up Joker and the Thief's original themes of duality and runs with it, taking a fresh and minimal approach.

A 100% custom design created by our in-house designer Pedro Oyarbide. The back design is comprised of a trippy tessellating sea of happy-sad faces.

The court cards are modelled on classics and have been completely illustrated by hand to create the distressed vibe associated with our brand. This rough around the edges approach continues onto the rest of the face cards and the Ace of Spades.

The tuck box is manufactured to the same premium standards as the rest of the Joker and the Thief line, with premium matte paper and interior printing - made possible with letterpress processes.

Due to their minimal ink saturation, handle sublimely. They're thin, and snappy thanks to their crushed stock. And once broken in, a deck of **Happy Sad** feel like they are an extension of your own hands.

Proudly made with sustainably sourced paper in the U.S.A.

Printed on premium crushed Stock and Finish by the United States Playing Card Company.
