

White Gold Edition V3 by Joker and the Thief - Pokerdeck

The new and improved version of **White Gold Edition**. Featuring sublime heavy embossing on all surfaces of the tuck box and other refinements.

Our brand of playing cards are distinctly unique amongst other playing cards on the market. That said, **White Gold Edition** has set the bar high not only for us, but for our competitors. It is by far our most popular design to date and easily the most elegant.

The white and gold color palette creates a third dimension of meaning, contrasting the darkness of the original deck.

This builds upon the conflict between life and mortality that is apparent on the back design creating literal duality. This mirrors the turbulent story that is evident within the court cards within this pack of cards.

White Gold Edition's tuck box is expertly crafted at our professional letterpress studio using imported paper and gorgeous satin hot foil stamping techniques not only on the outside of the box but inside too. It is capped with a perforated seal for contrast and ease of access.

Printed by the famous United States Playing Card Company in Kentucky, featuring their famous crush stock and finish.
