

FULTONS OCTOBER TOMBSTONE GREY PLAYING CARDS

Fulton's October began life as a much different deck before emerging as the preeminent choice of the Halloween Season. After looking back through our archives, it became apparent that a previously unreleased version Steven Noble created was ultimately perfect. This is the Steven Noble Version as presented in 2013 (a v.0 if you will) and to honor the longevity of this classic deck...we are printing it as it was envisioned. This Ultimate Edition is "borderless", untamed and more minimalistic in the intricate iron design which now forms the edges of the design. A completely new back take on the iconic back.

Tombstone Grey card backs and fronts -accentuated with pops of white. A striking new tuck box design hand illustrated by the legendary Steven Noble - featuring a border inspired by the legendary iron gates of October. This is the best October has ever looked.

- Art by Steven Noble
- Embossed Tuck Box with hand illustrated interior printing.
- PRINTED in China on Cardistry Premium Stock
