

EDC Ghost Whiteboard by Shadow Lin & TCC Magic

Pocket-Ready Spirit Writing, Fully in View.

The EDC Ghost Whiteboard reimagines the traditional blackboard-and-chalk format as a clean whiteboard-and-marker system. Its palm-sized writing area is optimized for comfortable handling, while still preserving and using the classic mechanical structure of Spirit Slates.

The whiteboard is sized to match standard Bicycle playing cards, allowing it to be combined with cards for more varied and interesting magic effects. The tutorial includes four routines:

Destiny: The selected card is predicted on the whiteboard, with the real surprise revealed when every other card is shown to be blank.

Spirit Writing: The prediction appears not to match, until the surprise is revealed.

Fusion: The symbol on the magician's board mysteriously transfers to the participant's board.

The Magic Brush: The magician accurately draws the selected card, and the drawing manifests as a real playing card.

The Ghost Whiteboard is made with sapele wood as the main body. Its smooth wood grain gives it refined collectible appeal, while the overall size, thickness, and edge finishing have been carefully adjusted for a comfortable one-handed grip.

The magnetic system has been redesigned to make it slimmer and lighter, while keeping the handling more natural and comfortable. The balanced proportions give the whiteboard a minimalist, aesthetically pleasing look.

All four sides of the two whiteboards can be written on normally, and both sides of the gimmick section can also be written on freely, placing the ghost-writing effect fully within your sight and control.

Red and black whiteboard markers with built-in brush tips are included, so you can start practicing and performing straight out of the box. The set also comes with a double-sided velvet pouch for carrying the whiteboards and accessories, making it easy to keep everything ready for everyday use.

We hope this product enriches your daily performances and becomes an

essential tool in your magic arsenal.

Features

Designed for portability and close-up performance.

Retains the classic slate structure while expanding the possibilities for magic routines.

Can be used as a single board and is sized to match Bicycle playing cards for card-based handling.

Overall size and thickness are designed for a comfortable one-handed grip.

Crafted from solid sapele wood with smooth, refined grain and collectible appeal.

Includes four dedicated routines and a detailed tutorial of over one hour.
