

Pan - Large - Double - Stainless Steel

There are countless effects you can create. For example, put a little flour and yeast into the pan, close it for a moment with the lid, and just like that a cake is ready (real or fake). Another effect: pour a little gasoline into the pan and then set it on fire, immediately cover it with the lid to put out the flames, and when you open it again... lots of candies, popcorn, or other surprises will appear!

A classic magic trick that always makes an impact!

- The pan has an inner diameter of 22 cm. It is made of stainless steel.
- This model has a double load, so you can even make two productions one right after the other!
