

Dice Explosion

Show the audience a white die inside a transparent container. Shake the jar and instantly, with no cover and no suspicious moves, the die will “explode” into eight small white dice!

All of it happens right before your spectators’ astonished eyes.

- Easy to do and highly effective!
- The die can also be changed into a small ball, a sugar cube, etc.

Di Fatta is very proud of this new model of Dice Bomb they have produced. The features that make it unique are as follows:

- The prop can be completely examined at the end of the effect.
- The transparent plastic of the container is even clearer and more crystal-clear.
- the large die is made of plastic, like all normal dice, and this makes the trick even more baffling.
- the lid is entirely made of plastic and can be examined.
- These clever details, which you will fully appreciate after purchasing it, have made our version the best on the market.
