

Dimensional Cube by Magic Class & TCC Magic

Transform a cube into candy, liquid, or virtually anything. Split one cube into two, then three. Perform a striking instant solve, create elusive cube-and-bill effects, and explore Cube Fly, Think, and more.

Dimensional Cube is more than a single magic prop. It is a versatile cube system built for creative possibilities.

The cube is a classic puzzle that almost everyone recognizes, which makes it a natural medium for impossible moments. Drawing on magician Panky Zhu's extensive performance experience and passion for cube magic, Magic Class developed Dimensional Cube as a flexible system for a wide range of visual effects.

Perform Cube to Anything, Cube Split, Cube Solve, Cube & Bill, Cube Fly, Think, and more. Each routine can be combined or adapted to suit your style, whether you want fast, direct visual impact or a powerful addition to your existing cube magic.

Dimensional Cube closely matches the look and feel of a high-quality commercial cube. Its natural color blocks, carefully proportioned stickers, realistic structure, and familiar grip make it virtually indistinguishable from an ordinary cube at first glance.

The main body is made from injection-molded ABS with a fine, smooth surface and a solid, stable structure. Its authentic appearance makes each effect feel more natural and helps the audience remain immersed in the magic.

The set also includes an exclusive aluminum-alloy holder designed for real-world performance. Lightweight yet rugged, it keeps the props organized and within reach during storage, transportation, and performance, whether you are performing impromptu magic or presenting a formal stage show.

What's Included

- 2 • High-quality standard cubes
- 2 • Black boxes
- 2 • Standard cube shells

- 2 – Custom elastic shells
- 1 – Exclusive cube holder
