

Sucker Punch: Revolutions

In 2016, Sucker Punch changed the game for coin magic. Designed by the late, great Mark Southworth, for many magicians it was the very first step into gaffed coin work.

A decade later, that same vision is reborn with **Sucker Punch: Revolutions**.

Sucker Punch: Revolutions is a specialized set of seven uber powerful poker chip gimmicks and regular ungimmicked chips that smashes open the door to coin magic.

It is a complete toolkit designed to let you explore a wide range of impossible gaffs, and take your coin magic from your first chip to a full stack of routines.

This is just ONE trick that **Sucker Punch: Revolutions** can give you:

Imagine placing a stack of poker chips in your spectator's hand. You pick the top chip off the stack and make the chip vanish. Then with a wave, the entire stack transforms into candy!

Not only is this a visual punch in the gut, but it is the kind of magic that can start a "revolution."

And this is just one of the dozens of effects you'll be able to perform with this set!

So if that's just one of the effects, what does this set actually include?

Here's what's Included:

- Slippery Sam Gimmick
- Locking Flipper Chip
- Chip Stack Gimmick
- Chip Shell
- Sharpie Through Chip Gimmick
- Folding Chip
- Floating Chip
- Regular Chips
- Additional Red AND Blue Stickers for even more customization!

All crafted to match the feel and quality of the original Sucker Punch Set.

What all these gimmicks **ACTUALLY** give you:

You are not just picking up one-off effects. You are giving yourself a genuine doorway into coin magic, and it all starts with this set of poker chips.

With this set, you can:

- Perform visual vanishes, appearances, penetrations, and transformations
- Build single, stand-alone routines or entire mini-sets structured entirely around poker chips.
- Drive a poker chip straight through a glass or cup in a clean, impossible penetration.
- Perform Copper/Silver style routines that get genuine, big reactions.
- Float a chip off a stack in a way that looks like camera trickery.
- Carry an entire working set of chip magic in a single pocket, ready to go anytime.
