

## Print by Marco Markiewicz

Take an envelope out of your pocket. Inside is a prediction.

Remove the card and show it to the spectator: it is completely blank.

Place it back inside the envelope, then take out a deck of cards and have the spectator

freely choose any card.

Snap your fingers... then remove the card from the envelope.

The card has printed itself !

The prediction is now an exact match for the card chosen by the spectator.

- No card change.
- No special envelope.
- Use any deck of cards you like.
- Use any envelope.

And most importantly, customize your prediction card however you want.
