

Instant Flame by Mai Bro & TCC Magic

A mini device that bursts out stunning flames out of nowhere.

Following the "Shell" Game and the EDC Holder, Mai Bro returns with a brand-new utility: Instant Flame.

Designed to conjure stunning bursts of fire from nowhere, Instant Flame blends visual impact with seamless functionality. It moves beyond the bulk of traditional ignition devices with a miniature, elegant design that remains completely hidden when worn.

Setup is nearly instantaneous: no complex calibration or remote controls required. With a simple trigger, you can create a high-stakes performance highlight at a moment's notice.

The possibilities extend beyond simple fire production. Use it to produce a spectator's chosen card, or manifest coins and roses from within the glow. For those seeking a more dramatic effect, combining the device with rosin powder produces a massive, shocking flame.

Whether it is close-up magic or stage magic, Instant Flame can be perfectly adapted. With its small size, it carries powerful functionality, connects every surprising node of the performance with flames, and also allows the audience to feel the unique charm of magic in the unexpected flame light and shadow.

Zero Remote Needed
