

Card Castle Production (from 6 Card Repeat)

The performer counts out six cards. Three are removed and placed on a tray, but when the magician counts the cards again, he still has six in his hands. He repeats the effect several times, always throwing the cards on the tray, until all of them have been removed. To finish, a wonderful castle of cards magically appears from the tray!

- Everything is made with great care. Everything needed is included: cards, castle, and tray.
- The castle opens and closes really well. It is definitely stable, practical, and visible from a distance. It stands 54 cm tall and is 32 cm wide at the base.
