

Tarot Project by Casey Tang and larvel Magic

This is a Tarot-themed mentalism product filled with 6 different Tarot routines and gaffs. "Tarot Project 2.0" offers mentalists and magicians a series of unique Tarot-themed mentalism effects and routines. The magic elements in the routines complement the Tarot readings, rather than being mere superficial additions.

The included routines are designed to leave the audience with an uplifting and positive experience. By leveraging the symbolic meanings and interpretive nature of Tarot cards, your performance will resonate more deeply with spectators- because it's a reading about their future, a reflection of their inner self. Through the medium of Tarot, both mentalists and magicians can more effectively convey the emotions and messages they wish to share with their audience.
