

52 on 1 card - Prediction

The magician pulls out a prediction, and puts it on the table. He asks a spectator to select a playing card from a deck. Having stated that the chosen card is on his prediction, he turns it around and... everybody will see that ALL the cards of the deck are printed on the card! But after a laugh for this silly gag, the magician turns his prediction over to show that on the other side... ONLY the selected card is printed nice and large.

Great to sell combined with our Svengali deck (MAZZSE).
