

The Cube ZERO by SYOUMA

We have developed a new gimmick for the puzzle cube-a groundbreaking device that will impress even the most dedicated enthusiasts.

Thanks to its simple yet ingenious design, this gimmick enables effects that were previously impossible. You can place a scrambled cube into the box, perform a magical gesture, and instantly transform it into a solved state. No special sleight of hand is required; the gimmick does the work, making it easy for anyone to perform. Even more impressive, you can actually turn and rotate the cube both before and after the transformation. The instructions cover two routines: one where you hand the scrambled cube to the audience at the start, and another where you hand the solved cube to them at the end. In the first scenario, you can even have the audience scramble the cube themselves beforehand. In the second, you can hand the solved cube directly to the audience and immediately use it for another cube routine. Choose the method that best suits your performance style.

Additionally, a routine is included where the cube transforms into a clear box. You can place items like candy, a ring, or a surprise gift inside the clear box to create a wide variety of magical presentations!

Set Contents

- Special box and complete gimmick set
- Puzzle cube
- Clear box
