

Use Me Box

A practical, clever accessory designed for anyone who wants to travel light without giving up a roomy, elegant, and functional container. Ideal for use as a “ditch” during your performance, it lets you easily store props and materials after use. At the same time, it can also serve as a handy container to keep everything you need within easy reach during your act, such as balls, candy, or other accessories.

Carefully made from sturdy cardboard and finished with edges reinforced in cloth tape, it offers excellent strength and long-lasting durability. Its biggest advantage? It closes, folds flat, and is incredibly easy to carry. It's lightweight, compact, and sets up in just seconds: a practical, professional solution that's truly indispensable.

A real must-have for artists, magicians, and performers.

- When closed and flattened, the container measures 30.5 cm long, 1.5 cm thick, and 28 cm at its widest point. Once opened and assembled, it keeps the same height; the long sides measure 29.5 cm each, while the short sides of the base measure 22.5 cm.
