

Tricon Production

The magician displays a multicolored board and transforms it into a cone. From inside it, he produces colorful silks, spring flowers, etc.

It is a versatile cone and can also be used for many other effects. For example, drop four separate ribbon rings into the cone and, as if by magic, have them all link together. Or you can pour milk into the cone from a pitcher/glass and transform it into white confetti.

Many more ideas will come to mind as you use your imagination!

- The cone is made of sturdy cardboard and cloth tape.
- When closed, it measures 18 cm across the top and 32.5 cm high. Production material not included.
