

Teddy Unframed by Bond Lee & JC Magic

Imagine bringing a drawing to life.

The performer displays a picture frame featuring a cute teddy bear printed on a white canvas. With a simple shake, the teddy bear visually vanishes from the artwork, leaving only an empty silhouette behind.

Then comes the impossible moment.

The center panel of the frame suddenly disappears, and a three-dimensional teddy bear instantly appears in its place-stepping out from the picture and into reality. The bear is holding a customizable sign that can display any message you desire.

Whether it's "Happy Birthday," "Merry Christmas," "Congratulations," a company logo, a photo, or any personalized artwork, Teddy Unframe transforms a magical production into a powerful presentation piece.

Perfect for birthday parties, holiday events, school shows, corporate performances, product launches, and stage presentations, Teddy Unframe combines visual magic with endless customization possibilities.
