

Majolica V2 Luminescent Playing Cards

The Majolica V2 deck is printed with a special green Luminescent ink that glows in the dark for several minutes after being exposed to light. The tuck box features a die-cut window, allowing the glowing effect to be seen even when the box is closed.

Features:

- Green luminescent ink
- 310gsm stock
- Air-Cushion Finish
- Limited edition of 350 decks
- Die-cut tuck box

Please note: Due to the additional layer of luminescent ink, the cards are slightly thicker than a standard deck. With regular use, the luminescent ink may gradually show some signs of wear.
