

Screen Cube by Tora Magic - Bühnentrick

A Cube Prediction... You Never Touch!

Show your audience an empty frame and a cube.

Hand the cube to a spectator and let them mix it however they like. Tell them that your prediction is already displayed on the tablet screen and that you will not touch the tablet or the cube during the entire process.

The spectator then places the mixed cube inside the frame, choosing any side they wish. Finally, they open the prediction on the tablet... This is where the real magic happens!

The cube perfectly matches the prediction!

A powerful and visual prediction effect combining a freely mixed cube, a completely free choice and an impossible final revelation.
