

No Way to Peek by Magic's Express

NO WAY TO PEEK by Magic's Express is a precision-made aluminum dice mystery. Know which number is facing up inside a sealed box—no electronics or sleight of hand.

A Sealed Dice Mystery by Magic's Express

The design of NO WAY TO PEEK was inspired by classic photographic film canisters – compact containers designed to keep film safely sealed away from light.

We took that simple idea and turned it into an impossible dice mystery.

A die is placed inside the box and the lid is screwed tightly shut.

Without opening the box, and without seeing the die, the magician can still know exactly which number is facing up.

The spectator can freely examine both the box and the die, choose any number, place the die inside, and seal the box themselves.

NO WAY TO PEEK is precision-made from aluminum alloy and designed for simple, practical real-world performance.

No electronics.

No sleight of hand.

Fully examinable.

Easy to perform.

Use it for predictions, mind reading, or create your own routines around the impossible idea of knowing what is inside a completely sealed box.

Key Features

- Solid aluminum alloy construction
- Secure threaded screw-on lid
- Fully examinable box and die
- Free choice of any number
- No electronics or sleight of hand

- 3 complete routines taught in the video instructions

What's Included

- 1 × Aluminum Alloy Dice Box
- 1 × Specially Made Die
- 1 × Special Accessory
- Video Instructions with 3 Complete Routines

No electronics. No sleight of hand. No way to peek.

This is NO WAY TO PEEK by Magic's Express.
