

## Extreme Thumb Tip by Alan Wong

The extreme thumb tip is so different than all other thumb tips on the market and can claim to be the toughest in the world. Road tested by rolled over by a car, boiled to 100 degrees and set on fire. It remained the same without any damage.

It is made of high-grade pure silicone and is practically unbreakable. It will not melt, crack, bend, get dirty and it can last for years if not forever.

It can also be used as a card shooting device, fire and liquid effects using this thumb tip. One size only.

Extreme Thumb Tip. Extremely durable. Extremely reliable.
