

Bicycle Seasons (Winter Edition) Playing Cards

The Bicycle collaboration is the first work in its history to be based on the style of Chinese ink-wash painting. The theme is the four seasons of the year, and the 24 solar terms of Jiangnan in China are integrated into this small card surface, connecting them into a series of unique and charming pictures, allowing each season to be engraved with its own poetic name. The misty rain of early spring, the lotus pond of midsummer, the migratory birds of late autumn, and the sweet fragrance of winter.

Seeing all this, does it evoke layers of associations in you? With playing cards as the medium, this brand-new artistic world is constructed, as if one could stroll through the corridor of the changing seasons and appreciate the breathtaking pictures painted by different seasons.
