

Arm Apart by Vincenzo Di Fatta

The magician places his arm inside a box and inserts two solid blades in its middle. By doing this, the arm is cut in two pieces and the box is opened to show this impossible illusion! Once the box is closed again and the blades removed, the arm is obviously unhurt.

- Improved with a NEW CLEVER SECRET that makes the illusion even more deceptive!

This item presents an incredible innovation and refinement: the box is CLOSED ON ALL ITS SIDES and this makes the trick much more mysterious.

- Very well-made.
