

## Portable Wine Glass Set by Murphy's Magic

For generations, magicians have relied on the elegance of a wine glass in countless classic routines. The problem? Traditional glass is fragile, bulky, and never ideal for life on the road.

Meet the **Portable Wine Glass**, a professional performance glass designed specifically for working magicians.

Crafted from a premium crystal-clear performance material with the appearance of real glass, it delivers the elegant look your audience expects while offering the durability and peace of mind every performer appreciates. Whether you're traveling across town or across the globe, you can pack your wine glass with confidence.

Its precision engineered removable stem allows the glass to disassemble in seconds, dramatically reducing its size for compact storage and safe transport. When it's showtime, simply assemble the glass and you're ready to perform.

Even better, this versatile design is equally at home with or without the stem, making it perfect for a wide variety of routines and performance styles. From the classic Silk to Glass and Egg in Glass to productions, vanishes, transpositions, comedy routines, and countless original effects, the possibilities are nearly endless.

Unlike delicate glassware that demands constant care, this performance-ready design is built for the realities of professional magic—lightweight, durable, easy to transport, and always ready for the next show.

To keep everything looking its best, every Portable Wine Glass includes a premium protective carrying case and microfiber cleaning cloth, ensuring your glass remains spotless and protected between performances.

Once you've traveled with a **Portable Wine Glass**, you'll never want to pack a traditional glass again.

### Includes:
