

Rope Fusion by Vincenzo Di Fatta

In full view of the audience, a short rope and a long rope become exactly the same length! But the real surprise comes next.

The two ropes magically fuse together and become one single solid piece of rope! A powerful, visual moment that feels truly impossible.

And that's not all: the instructions also explain a brilliant additional finale. After the ropes have fused into one, the magician makes the ends of the rope magically jump from his pocket into his hand, delivering a stunning and memorable ending.

A rope routine that doesn't just fool, it sticks in the audience's mind.

- Incredible
- Easy to do
- Detailed instructions included

Perfect for close-up, street magic, family shows, and casual performances.
