Ether Light by Alan & Zazza

Have you always wanted to create a light from your hands without using the usual props that everyone already knows?
Ether Light lets you create a light from your hands while staying completely clean!
And there’s more! You’ll be able to make coins, pins, and small objects vanish in a flash of light, or produce objects from a glow.
It can be used in your D-Light routines and many other magic effects!

Ether Light is the gimmick used by Zazza in his FISM act The Rubik's Cube Super Hero.

Inside the package you will find:
Ether Light gimmick.
A holder designed by Alan, to easily palm Ether Light.
Screwdriver and reel.
CR2032 battery included, suitable for close-up performances.

To get a brighter light, like in the video and ideal for stage performances, you can use LIR2032 rechargeable batteries, available online. The purchase link is included in the package.
