

## Thread Reel Micro

This is much smaller than the standard ITR. The effects you can make are the same than ITR standard, but, due to its size it is easier to hide and use.

After having reached an agreement with the manufacturing company on a better price, we supply you with 3 gimmicks in each package. In this way, should one gimmick get damaged, you still have two extra.

- Gimmick size: cm 4 (about 1.5").
- Each package contains three pieces.
- The part of usable thread is about 1 meter long.
