

Street Shells by Whit Haydn and Chef Anton - Trick

Over six months in the making, Whit Haydn and Chef Anton have created the perfect shells for any Three Shell Game routine. Including design enhancements and tips from real working pros like Chanin, Eddie Joseph and others, these shells are perfectly weighted and balanced and they feel like real shells!

The Street Shells set includes three shells, drawstring bag and the perfect peas (both hard and soft rubber).

"They carry easily with a couple of peas in my jacket pocket, and can work on any surface--even a cocktail bar--without a mat. They look and feel and handle like real shells. They even sound like real shells when they are placed on the wood surface of a bar, or on a marble coffee-table." - Whit Haydn

NOTE: The Street Shells set is intended for those who already know a three shell routine and does not include any instructions. Take a look at the Super Shells book, Bob Kohler's Golden Shells video or Phil Cass' video if you'd like to learn a routine.
